Find the installation instructions for inductive sensors in the download area of the sensor on the homepage.
Status LED:
Off: No supply voltage or sensor defective
Green: Sensor ready, supply voltage applied
Yellow: Target detected
Red: Error detected: short circuit
undervoltage < 5-8 VDC
overtemperature or overload
Error condition is only displayed in damped state
Effective operating distance Sr: Lower tolerance limit can be -12.5% in exceptional cases.
For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
